

# BELT CONVEYOR

No more guide rails that causes damages to the wheels. Much more safer

Easier loading on the belt for your customers

Allows you to accommodate dual rear-wheeled vehicles as well as low clearance exotic vehicles

Required maintenance is less than traditional conveyor

Unique experience for your customer

Both customers and owners will appreciate that it is faster, and that there are no rollers jump over the guide and no more claims related to the conveyor

Belt conveyor is the future

## Technical Specification
